"I'M BUSY, WHY SHOULD I CARE ABOUT THIS?"

- These are four of 20 tracks created with an analog 8-track machine, razor blade edits, mixing console punch in/outs and really, really loud guitar amplifiers.
- The self-imposed structure creates discipline, so the music grows out of the constraints and medium. But in a good way. Really.
- Justin's other band - the Austerity Program - was a stalwart on oddball metal label Hydra Head before they hit the silk.
- Super DIY as always - this was conceived, performed, recorded, assembled, designed and released via the artist's own hand.
